Documentation for Silver Award – Tree planting/Care Projects

Saint John the Evangelist School was recognized as a Maryland Green School in 2017. As part of caring for, improving, and integrating restoration the following has occurred throughout our campus since the spring of 2020.

In April of 2020, a storm came through the Severna Park area taking down two trees that stood for many years in front of our school building. After further examination it was determined that the trees were diseased and should be taken down for safety reasons. In early June, seven new trees were put in to replace those that were damaged and diseased.

*Recipient of the 2008*

*Blue Ribbon School Award*

As of today, we continue to care for our tree that was given to us upon receiving our Green School recognition in 2017. Our tree and our students continue to stay healthy and grow.
