Documentation for Silver Award – Tree planting/Care Projects

Saint John the Evangelist School is recognized as a Green School. As part of caring for, improving and integrating restoration the following have been placed throughout our campus since the spring of 2019. These improvements have helped to provide spaces for our students to participate in outdoor education, along with recognizing the need to be conscious of restoration of our trees.

- A St. Francis garden was installed, and 6 cedar trees were added to the space.

- Five holly bushes were added to our Mary garden along the new fence installed.

*Recipient of the 2008*

*Blue Ribbon School Award*

- 2 trees planted in May 2019 in the reforestation area located along Ritchie Hwy.
